

HIGH-SPEED RAPID DOORS

Speed and Durability

• **RAPID DOORS**

Features

Engineered for peak performance, our rapid door solutions are designed to streamline your operations while maintaining strict environmental control. Whether you need high-frequency access or **specialized thermal insulation**, **our solutions deliver reliability with a clean, modern finish.**

Applications

Choose the configuration that best suits your facility's requirements:

- **Standard High-Speed**

Built for durability and daily high-traffic use. This curtain is composed of a terylene **tailored** mesh-belt with a **PVC** coating, supported by streamlined glass-fiber reinforced terylene plales for maximum **structural integrity** and **wind resistance**.

- **Temperature Control (Cold Chain)**

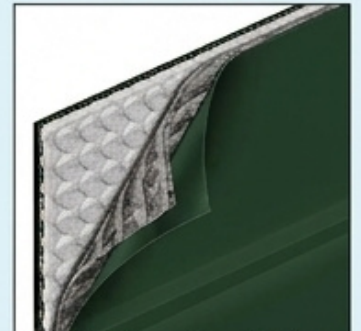

Designed for extreme environments ranging from +5°C down to -30°C. This specialized thermal insulation curtain prevents energy loss and frost buildup, making it ideal for cold storage and food processing facilities.

Technical Performance

Feature	Specification
Opening Speed	Adjustable up to 1.5m/s
Standard Curtain	PVC-coated terylene with glass-fiber reinforcement
Thermal Curtain	High-density insulation for +5°C to -30°C
Safety Systems	Wireless safety edges and infrared sensors
Aesthetic	Streamlined, modern design suitable for all professional sites

Standard High-Speed Door with Photocell Sensors

Multi-layer Insulation (+5°C to -30°C)

Red/Clear Sectional Rapid Door

Yellow Single-Panel Rapid Door with Window
